

**ANNOUNCING OUR GRAND
ENTRANCE INTO THE WORLD
OF TC BRAZED CUTTERS.....**

Whether you are just trimming or profiling, we will make the right tool for your application. Just show us the profile you want and we will hand over to you within 10 days, the tool for the job.

We have the only precision 5 AXIS GRINDING MACHINE in Malaysia that will give you a mirror finish on your carbide tips, guaranteeing you a super sharp new tool. Your tool will be returned to you like a new tool even after every sharpening on this machine.

Furthermore, if you have some old “end-of-tool life” brazed cutters thrown away somewhere in your store, GOOD NEWS!!! Our 5 AXIS machine can recondition these cutters by retipping them and within 5 days you’ll have a Brazed Cutter that not only looks better, but cuts even better than when it was brand new. Another **LEUCO** creativity.

A German state-of –the-art balancing machine was recently acquired and this machine will, together with the grinding machine, make sure that your 4 cutting edge tool will be cutting your material on all 4 cutting edges precisely where it should be cutting. And this is a Guarantee that comes “Naturally With **LEUCO**”.

Every TC Brazed Cutter tool made here in **LEUCO** Malaysia is done to our customers’ wishes, which are often very distinctive and individual, and they are done with passion and dedication by our design engineers and technicians who will be contended with only the BEST.

We are offering you German Quality Material, German Precision, German Durability, German Quality Tools, German Quality Service, and all these come with a MALAYSIAN PRICE tag.

These are the samples of profiles that our tools are able to create. We can custom make any tool for your profile requirements.

Dear Valued Customers,

As we can see, today’s timber processing need to focus more on maximized recovery and high productivity.

Applications in solid wood require high profile accuracy and repeatability. Making your products quality products

Durable and high performance tooling means constant high feed speed at minimum down time, high tool efficiency will ensure that you achieve maximum productivity.

We have the capabilities and the capacity to deliver these precision brazed cutters to you in a very short delivery time. We encourage you to take advantage of this service.

Let **LEUCO** handle your tooling problems as this is our specialty and we have years of experience backing us up. In tooling, as the Chinese saying goes, “We have crossed more bridges that you have crossed roads”. We are here for you. Make us work for you.

For a price quotation, just give us a call and send us a sketch of the profile you want and we will start work on your tool immediately.
